DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Schmid et al (U.S. Patent 5,804,116).

Schmid et al (see the entire document, in particular, col. 5, line 58 to col. 6, line 24) teaches a process including the steps of roller embossing a first pattern on a sheet of electrically conductive material, and then reciprocal embossing (or stamp embossing) a second embossed pattern on the sheet (note especially col. 6, lines 2-5). The preamble of claim 1 ("[a] method of fabricating a fluid flow plate") is not considered to be a claim limitation and is of no significance to claim construction principally because the body of claim 1 fully sets forth all of the limitations of the claimed invention, and the preamble states the purpose or intended use of the invention (*Pitney Bowes, Inc. v. Hewlett-Packard Co.*, 182 F.3d 1298, 1305, 51 USPQ2d 1161, 1165 (Fed. Cir. 1999)).

Allowable Subject Matter

4. Claims 2-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,649,102 B2 teaches a process of cutting an expanded graphite sheet.
